Freelancing
- Orchestrate projects from scratch as a full stack developer
- Guide co-workers and assisted members assuring 100% smoother execution

Education

2018 - 2022

International School of Management and Technology, Nepal — *BSc. (Hons) Computer Systems Engineering*

2016 - 2018

Liverpool International College, Nepal - *+2 Level (Management)*

Projects:

MyBooks: https://github.com/CodingWithDibesh/MyBooks
A simple demonstration of books, showcasing use case of NextJS

NextJs-Skeleton: https://github.com/CodingWithDibesh/NextJs-Skeleton
A complete monolith setup for front app using NextJS, Tailwind and TurboRepo with minimal tooling's

Monolith: https://github.com/CodingWithDibesh/monolith
Setup a full stack mono repo including NestJs-Skeleton and accommodate CI/CD and Backend Setup (NestJS) with PostgreSQL

Cleaner: https://github.com/dibe-sh/cleaner
A cleaner that checks pattern on file and folder's and removes it, initially originated from hassle for removing node_module and configuration files

TimeZone-Usecases: https://github.com/CodingWithDibesh/Timezone-Usecase
A simple project demonstrating Time Zone and its use cases and how to handle time related issues

Nodefslogger: https://github.com/itSubeDibesh/nodefslogger
A simple logger that logs stuff on console and on organized file as well

Awards

Most Improved Performer Award
- 2023, at wesionaryTEAM

Participant at Inter College Hackathon
- 2019, at Asian School of Management and Technology

Skills

Web: Express/NestJS[Node JS], React, Vue, NextJS, GoLang

DevOps: Docker, Linux, GitHub Actions (CI/CD)

Database: SQL, MongoDB

Testing Tool: Figma, VSCode

Soft Skills: Time management, Problem solving, Task Distribution, Communication
